Hours required 160

MEDICAL ASSISTANT PROGRAM DESCRIPTION

Medical Assisting is a multi-skilled allied health profession in which practitioners work primarily in ambulatory settings, such as medical offices and clinics. Medical assistants function as members of the health care delivery team and perform administrative duties and clinical procedures.

Graduates are encouraged to take a national certifying medical assistant exam. Passing a certification exam entitles the graduate to use the affiliated credential: CCMA (NHA) or RMA (AMT) or CMA (AAMA) depending on the chosen exam entity.

Additionally, passing a medical assistant certification exam can lead to better employment opportunities.
